| github.com/utkarshgupta188 | Portfolio: utkarshgupta.qzz.io

SUMMARY

Full-stack developer with 5+ shipped projects in React/TypeScript and Python/FastAPI. Developed an AI-powered CLI tool (GitDude) that improved productivity by 70%. Seeking a full-stack internship to apply API design, deployment, and automation skills.

SKILLS

Languages: Python, JavaScript, TypeScript, C++, C, PHP

Frontend: React, Vite, HTML/CSS, Next.js

Backend & Databases: FastAPI, Flask, Node.js, MySQL, PostgreSQL, Redis, Firebase, REST API

Tools & Cloud: Git, Docker, Nginx, Postman, Vercel, Netlify, Render, Burpsuite

AI/Data: LLM integration, multi-LLM tooling, data analysis, web scraping (BeautifulSoup), RAG

EXPERIENCE

Software Developer Intern | Trikara Technologies Pvt. Ltd.

August 2026 – Expected Completion: Jan 2027

- Helping to build scalable web applications and backend systems.
- Using advanced technologies like React, Next.js, Node.js, TypeScript, Git, and REST APIs.
- Partnering with the development team to incorporate new functionality and fix problems.
- Adhering to coding standards, testing, and code review process.

PROJECTS

GitDude (github.com/utkarshgupta188/gitdude)

Python, Multi-LLM APIs, CLI

- Built an AI-powered CLI tool that converts natural language into Git commands, with support for multiple LLM providers so users aren't locked into a single API.
- Implemented automated testing around command parsing and execution to ensure reliability, increasing day-to-day commit-workflow productivity by up to 70% in internal use.

CodeFlux (github.com/utkarshgupta188/codeflux)

Python, FastAPI, AI Code Analysis

- Built an AI-based code-routing gateway that performs automated code analysis and routes requests based on code version, improving consistency across analysis runs.
- Optimized the analysis pipeline to cut code analysis time by 30%, making the gateway practical for use in faster development cycles.

Meowly (github.com/utkarshgupta188/meowly)

Next.js, TypeScript

- Built a streaming platform delivering anime, cartoons, and TV shows, with a responsive Next.js/TypeScript frontend organized into browsable categories.
- Implemented lazy-loaded media playback and client-side routing to keep page loads fast and navigation smooth across devices.

Dora Music

React, Web Audio

- Designed a web-based music player with a Glassmorphism UI, giving it a distinct, modern look compared to standard music-player templates.
- Built an infinite radio feature with high-quality audio streaming, allowing continuous playback without manual track selection.

Attendance Tracking Application

Python, BeautifulSoup, Vercel

- Built a custom API using BeautifulSoup to scrape and structure subject-wise attendance data from the college portal.
- Hosted the service on Vercel for on-demand access, removing the need to manually check the portal for attendance updates.

P2P File Sharing Application (github.com/utkarshgupta188/sharelink)

Node.js, TypeScript,

Socket.io, Express

- Built a secure peer-to-peer file sharing application with OTP-based authentication and real-time peer discovery.
- Implemented secure file upload/download functionality and integrated with Render for deployment.

Prompt Enhancer (github.com/utkarshgupta188/prompt-enhancer)

Python, PyQt5, OpenAI API

- Developed a global AI-powered utility for Windows that enhances text instantly across any application using customizable hotkeys.
- Integrated system tray functionality and configurable enhancement modes to streamline user workflows.

MindMate (github.com/utkarshgupta188/mindmate)

TypeScript, React,

Next.js, Node.js, PostgreSQL

- An AI-powered mental wellness companion featuring mood/stress tracking, personalized recommendations, and real-time analytics.
- Integrated AI-driven chatbots, mood visualization charts, and interactive wellness widgets like breathing games and journaling tools.
- Leveraged Sentiment Analysis and Yolo-based emotion detection to provide tailored user experiences.

CERTIFICATIONS

Oracle Cloud Infrastructure 2025 Certified Generative AI Professional (Oracle) | Postman API Fundamentals Student Expert | Python Development & Data Science | PHP for Beginners: PHP/MySQL/PDO | Introduction to IoT

EDUCATION

Bachelor of Technology (B.Tech), Computer Science | LNCT Group of Colleges

Expected Graduation: 2028 | CGPA: 8.5/10

Class 10 & Class 12 (PCM) | DAV Schools Network

Percentage: 80% | Mar 2023
