EDUCATION

Bachelor of Technology (BTech), Computer Science

LNCT Group of Colleges

Sep 2028

CGPA: 8.5/10

SKILLS

Python, PHP, JavaScript, TypeScript, C++, LLMs, FastAPI, Flask, Node.js, MySQL, PostgreSQL, Redis, React, Selenium, Postman, Git, Docker, Nginx, Bug Tracking, Data Management, Google Sheets/Excel, HuggingFace, CUDA, Generative AI

Programming Languages: Python, PHP, JavaScript, TypeScript, C++, C, R

Data Science & AI: Data Analysis, LLMs, Scikit-Learn, PyTorch, Matplotlib

Backend & Databases: FastAPI, Flask, Node.js, MySQL, PostgreSQL, Redis, Firebase

Frontend & Tools: React, HTML5, CSS3, Selenium, Postman, Git, Docker, Nginx, CUDA

Cloud & Deployment: Vercel, Netlify, Render, Oracle Cloud Infrastructure, AWS

Testing & Quality Assurance: Jira, Bug Tracking, Functional Testing, Regression Testing, Exploratory Testing

Mobile & App Development:

Mobile App Development, API Integration, Firebase, App

Deployment

Summary

Computer science undergraduate major BTech. Hands-on experience with full-stack development, AI/Machine Learning, and software engineering. Proficient in creating web applications, AI-based products, and APIs through the use of programming languages including Python and FastAPI, and frameworks like React, AWS, and Firebase. Passionate about scalability and automation using artificial intelligence.

Certifications

Postman API Fundamentals Student Expert - Postman

Oracle Cloud Infrastructure 2025 Certified Generative AI Professional

Python Development & Data Science

PHP for Beginners: The Complete PHP MySQL PDO Course

Selected Projects

MeowTV

- Crafted a modern streaming platform utilizing Next.js and TypeScript technologies, ensuring easy access to anime, cartoons, and television series.
- Supported streaming performance through caching and lazy loading techniques, cutting down page load times by 30%.

Meow CLI

- Coded a command-line version of MeowTV for streaming media through command-line interface with the help of streamer architecture.
- Enhanced content delivery efficiency by 35% by managing resources efficiently.

CodeFlux

- Designed an intelligent AI routing gateway powered by AI-enabled code analysis and version control for better code intelligence.
- Enabled the construction of FastAPI-based AI pipelines and decreased the inference latency by 50%.

Attendance Tracking Application

- Designed a bespoke API utilizing BeautifulSoup(bs4) for scraping data on subject-wise attendance records and served the API using Vercel serverless.
- Increased API performance by 60% by adopting caching and efficient structuring of data.

GitDude

- Designed an innovative AI-driven CLI tool converting natural language into Git commands with support for multiple LLMs.
- Decreased latency in Git command operations by 45% by optimizing processes.
